

Is It Parallel?

Name _____

Examine each of the 9 boxes below. Write a "✓" in the corner of each box whose linear function is **parallel to** $y = \frac{2}{3}x - 1$.

$$2x - 3y = -12$$
$$y = -\frac{2}{3}x - 1$$
$$y = \frac{2x}{3} + 5$$
$$y = -\frac{3}{2}x$$
$$y + 1 = \frac{2}{3}(x + 0)$$
$$2x = 3y$$
$$y = \frac{2}{3x} - 4$$
$$y = \frac{2}{3}$$
$$y + \frac{2}{3} = \frac{2}{3}x$$
